Cost Great; So Is Love for Baby

BY HARRY ANN CULLEN

Parents of the only living American baby born with deformities because the mother took this medicine were named Monday that part of their medical costs can be assumed by the county. The what specialists call their greatest burden—the emotional agony of raising such a child—does not concern Mr. and Mrs. William Wade, 22, of 1428 W. 14th St., Gardena.

The parents of seven-month-old William Jr., born with deformities of both arms, were happily conveying the boy with two thumbs—their own. Job of both maternal and paternal grandmothers and their other child, 13, the 2nd.

Not hanging over this picture is the terrible price of operations and possible, said Dr. Charles H. Harkness, M.D., that physicians at Harbor General Hospital will cost to the mother.

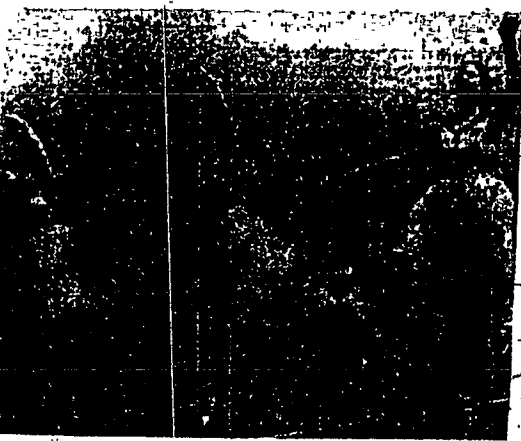

Cost to \$4,000

According to the young father, who met his bride-to-be in Germany while he was in the U.S. Army, she delivered 1951 in \$1,000, prior a period of 1949.

Dr. Harkness, medical director of the Child & Adolescent Psychiatry Project at UCLA Medical Center, who appeared with the couple on Phil Foster show over KTTV (11) Monday night, told The Times and Sunday funds are available in case involving physicians' fees through children's aid society, relative of the physically handicapped children's program with the Dept. of Children's Affairs.

LOTS OF LOVE—The new Mr. and Mrs. William Wade Jr. and daughter, Elizabeth, 2 1/2, for an American citizen. Wade Jr. had taken child home.
